PROFESSIONAL SUMMARY

Computer Science student with a 3.5/4 CGPA and hands-on experience in Data Science, Machine Learning, and Data Analytics. Proficient in Python, SQL, TensorFlow, Pandas, NumPy, and Scikit-learn, with strong problem-solving and analytical skills..

TECHNICAL SKILLS

Data Science & Analysis: Python (Pandas, NumPy, Matplotlib, Scikit-learn), EDA, Data Visualization, Statistical Modeling.

Machine Learning & Deep Learning: TensorFlow/Keras, MLP, Neural Networks, Classification, Regression, Batch Normalization, Loss Functions, Optimizers (Adam, SGD).

NLP: Tokenization.

Programming: Python, Java, JavaScript, C, C++.

Databases: MySQL, PostgreSQL (Learning).

Core CS: DSA, OOP, DBMS.

Web: React.js, HTML5, CSS3.

Tools: Git/GitHub, VS Code, Jupyter Notebook, Google Colab, Netlify.

PROJECTS:

1. Gaming vs Academic Performance | Machine Learning [Link](#)

- Applied Machine Learning models to analyze the impact of gaming habits on students' academic performance using Python and Scikit-learn.
- Performed data preprocessing, EDA, and classification using Logistic Regression, KNN, and Decision Tree models.

2. Employee Management System | Java, OOP [Link](#)

- Developed a robust system using Java, implementing OOP principles for high performance.
- Utilized Encapsulation and Inheritance to manage secure data and employee hierarchies.
- Applied Polymorphism and Abstraction for dynamic search and data filtering.

3. Course Management System | Java, DSA [Link](#)

- Engineered a console-based application using Custom Singly Linked Lists for dynamic data handling.
- Implemented Linear Search and Traversal algorithms to manage student enrollments.
- Created a menu-driven interface using Java's Scanner class.

4. HR Dashboard (Power BI) [Link](#)

- Built an interactive sales dashboard analyzing KPIs like attrition and working employees.
- Cleaned and transformed data using Excel and Power Query.

EDUCATION:

- Bachelor of Science in Computer Science, University of Karachi (UOK) — CGPA: 3.5/4.0
- Higher Secondary Certificate (HSC), Govt. Delhi College — 75%

CERTIFICATES:

1. Google Data Analytics Professional Certificate [Link](#)

- Developed strong skills in data cleaning, transformation and visualization using tools like SQL, spreadsheets and Tableau
- Applied data-driven decision-making techniques to analyze datasets and generate actionable insights.

2. Google Advanced Data Analytics Certificate [Link](#)

- Gained hands-on experience in statistical analysis, regression and machine learning concepts for solving complex data problems
- Built predictive models using Python to extract insights from large datasets
